Color StyleWriter 2400: Color Printing in Landscape Mode (6/96)

Article Created: 24 June 1996

TOPIC -----

I have a Color StyleWriter 2400 and I cannot print color documents in Landscape Mode. Black and white and grayscale documents print properly in Landscape, but when I print in color, the computer locks up after printing approximately 8% of the job. I am using the latest version of the Color StyleWriter 2400 driver (version 2.1.2). What am I doing wrong?

DISCUSSION -----

The Color StyleWriter 2400 driver will not print color in Landscape Mode if virtual memory is active. In order to print color documents in Landscape, you can turn off virtual memory, use the Quickdraw GX version of the driver, or use the new Color StyleWriter 2500 driver.
