American Macintosh Works With International ImageWriter

Article Created: 10 March 1988

Article Reviewed/Updated: 17 November 1994

TOPIC -----

Can I use an ImageWriter made outside of the United States with my Macintosh computer?

DISCUSSION -----

A domestic Macintosh may be used with an international version of the ImageWriter (such as the Japanese or European version).

Even though the power specifications change from country to country, or region to region, the RS232 and AppleTalk standards are universal throughout the world.
