## Imagewriter II: Paper Guide Screw Specifications (4/94)

Article Created: 12 April 1994

TOPIC -----

What are the specifications for the screws that hold the clear plastic paper guide in place on the ImageWriter II?

DISCUSSION -----

The paper guide is mounted using two 6mm long, 2.6 mm wide metric threaded panhead screws with a captive lock washer. The screws can be very difficult to find. To locate possible sources for metric screws, check your local yellow pages under "screws" for possible suppliers. Some hobby and hardware stores may also carry compatible screws.
