ColorSync 2.0: Compatible Version of LaserWriter Driver (7/95)

Article Created: 2 May 1995

Article Reviewed/Updated: 7 July 1995

TOPIC -----

What LaserWriter driver should I be using to be compatible with the ColorSync 2.0 format? I have a non-Apple PostScript color printer that was ColorSync 1.0 compatible.

DISCUSSION -----

The LaserWriter driver version 8.3 has ColorSync 2.0 support. Unless you already have it, you will also need to acquire a ColorSync 2.0 profile from the manufacturer of their printer.
