## Color LaserWriter 12/600 PS: Matching Color w/ Two Printers 7/95

Article Created: 6 June 1995

Article Reviewed/Updated: 19 July 1995

TOPIC -----

I have two Apple Color LaserWriter 12/600 PS printers, and I get slightly different colors from them. Is there any way to adjust the printers?

DISCUSSION -----

The printer is adjusted at the factory to produce the best possible image quality. All Color LaserWriter 12/600 PS printers come with these default settings in effect. To change the color balance refer to page 254 of the user's guide. This should only be used to make subtle changes to match multiple printers.

### NOTE:

One correction to that page of the User's Guide is in the Read Me. On returning to factory default (Step #7), the manual says to first select a color and hold the + and - buttons together. Instead, just hold down the + and - buttons for about 5 seconds and all colors return to the factory default settings.
