Color LaserWriter 12/600 PS: Duplex Printing Not Supported (7/95)

Article Created: 17 July 1995

TOPIC -----

Can I print on both sides of the paper using a Color LaserWriter 12/600 PS?

DISCUSSION -----

Duplex printing is not supported on the Color LaserWriter 12/600 PS. Using duplex printing can cause complications with the printer.

The toner material, if already applied and fused to the paper, can become sticky if passed through the fuser assembly again. It could then possibly adhere itself to the heater rollers in the fuser making it very difficult to remove. Damage to the fuser's heater rollers is possible.

Once the paper passes through the fuser assembly, and moisture is evaporated from it by the fuser's heater bulbs, the paper may tend to curl slightly. This may also cause potential paper jams or misfeeds.
