Color LaserWriter 12/600 PS: Page Count Keeps Resetting (9/95)

Article Created: 18 September 1995

TOPIC ---

The page count on my Color LaserWriter 12/600 PS resets every time I turn the
printer off. How can I make sure that the page count information is retained
when the printer is turned off?

DISCUSSION --

The Color LaserWriter 12/600 PS uses a 3.6 volt lithium battery at location BT1
on the I/O controller to retain the page count and other parameters when the
printer is powered off. If the battery voltage drops, or it is removed from the
I/O controller, then the page count information will no longer be retained.
Service Source contains additional information on battery testing and
replacement procedures.

Replacement batteries are available as a service part using part number
742-0011.
