Color LaserWriter 12/600 PS: Maximum Imageable Area (10/95)

Article Created: 17 October 1995

TOPIC -----

This article provides information about the maximum printable area for the Color LaserWriter 12/600 PS printer.

DISCUSSION -----

The imageable area on a page does not change with additional RAM in the Color LaserWriter 12/600 PS printer. The imageable area is defined in the PPD file for a specific printer. You can view the image values by opening the PPD file in a text editor or word processing application. Search through the text until you see the imageable areas defined. The formula to determine the imageable area is a little complicated, but here are the results.

Note:

The results are posted in fractions of an inch and are rounded to the nearest 100th of an inch.

Imageable Areas

=====

Letter

left margin - .20
right margin - .20
top margin - .315
bottom margin - .20

Legal/US Legal:

left margin - .20
right margin - .20
top margin - .315
bottom margin - .20

A4:

left margin - .20
right margin - .20
top margin - .32

bottom margin - .20
