LaserWriter 16/600 PS: Using the Fax With Pathworks

Article Created: 17 October 1994

TOPIC ---

Does the FAX option work for PC users using LANMAN queues (PathWorks and NTAS)?

DISCUSSION --

The fax option for the LaserWriter 16/600 PS is the same implementation as our
previous PostScript fax printers (LaserWriter Select 360f and the LaserWriter
Pro 810f). We have verified the functionality of PostScript fax for the NT
Advanced Server. PostScript Fax also works for PathWorks, however, only with the
standard LaserWriter 8.x drivers and selecting "fax" as the destination. Using
the LaserWriter 8.xf fax drivers seem to cause problems with the PathWorks print
queue. When printing from the client Macintosh, you must manually select the
corresponding fax PPD in order to utilize the printer's fax capability.
