## LaserWriter 16/600 PS: Fax Can Use Print Spooler (10/94)

Article Created: 24 October 1994

TOPIC -----

Can the Apple LaserWriter 16/600 PS have faxes spooled to it using the AppleShare Print Server?

DISCUSSION -----

Yes, you can spool fax jobs through an AppleShare Print Server just as you spool other print jobs. However, when Choosing an AppleShare Print Server as the "target" instead of the printer, you'll need to manually select the PPD:

- 1) Open the Chooser
- 2) Select the target server
- 3) Select "Setup"
- 4) Choose "Select PPD"
- 5) Select the LaserWriter 16/600 PS Fax PPD

You have to manually select the PPD because queries to the printer don't get routed through the spooler. Because of this, the print driver doesn't know what type of printer the job is sent to unless you manually select the printer.
