LaserWriter 16/600 PS: Custom Install NetWare Utilities (11/94)

Article Created: 2 November 1994

TOPIC --

This article discusses an error in LaserWriter 16/600 PS User's Guide.

DISCUSSION ---

The LaserWriter 16/600 PS User's Guide states that the Window utilities LWPMAN
and LWFORM are installed as part of the Express Installation. This is incorrect.
These utilities are installed only when you select Network Utilities from the
Custom Installation menu of the Installer.

These utilities are used to set NetWare parameters, so the default network
configuration doesn't require them.

More about the Utilities

LWPMAN is only needed if the NetWare administrator wants to change anything
about the printer's default PSERVER or RPRINTER configuration (for example,
change the NetWare printer name, add a password, or change the queue scan time
for the printer). LWFORM is only needed if the NetWare administrator wants to
use NetWare Forms.
