LaserWriter 16/600 PS: Manual Correction Sheet (11/94)

Article Created: 10 November 1994

TOPIC ---

This article contains the manual update sheet included in the LaserWriter 16/600
PS Accessory box.

DISCUSSION --

Update: LaserWriter 16/600 PS

Installing printer utilities for NetWare networks

Do I have to read this update? If you're a printer administrator who plans to
set up the LaserWriter 16/600 PS printer on a NetWare network, you should read
this update. Otherwise, you can ignore this update.

Some network administrators may need to use two DOS utilities called LWPMAN and
LWFORM. However, contrary to what the manual says, these utilities are not
installed as part of the express installation. To install these utilities,
follow these two steps instead of the single step mentioned on page 74:

1) Install the Adobe Printer Driver as described in "Installing the
   Windows Printer Software" in Chapter 7.

2) Run the installer program again, but choose the custom installation
   instead of the express installation. When the installer program asks
   what you want to install, choose NetWare Utilities.
