LaserWriter Pro 16/600 PS: Printer Reduces Size of Faxes (2/95)

Article Created: 17 February 1995

TOPIC -----

I am faxing a full length page to my LaserWriter 16/600 PS Fax printer and the printer is reducing the document by about 5-7%, is this normal?

DISCUSSION -----

Yes, a small amount of resizing is normal. The document must be resized so that the header on fax can be placed on the document properly. The width gets resized proportionally, so the document does not appear distorted. The overall reduction is approximately 5%.
