LaserWriter Fax: Using the WorldModem Without a Dialtone (3/95)

Article Created: 28 March 1995

TOPIC -----

My European customers have LaserWriter 16/600 PS printers with the International PostScript Fax Modem. They need for the printer fax modem to dial without first having to receive a dialtone.

Is there a setting somewhere to do this?

DISCUSSION -----

Posted to Apple supported online services is a patcher that enables blind dialing on the LaserWriter 16/600 PS International (WorldModem) PostScript Fax Modems. The patcher is called "Ignore Dialtone.sea

Using Ignore Dialtone

This software only works with the LaserWriter 16/600 PS International modem, also known as the "WorldModem."

Step 1

Open the Chooser and select a LaserWriter 16/600 PS having an International Fax Modem. Close Chooser.

Step 2

Launch the Ignore Dialtone patcher.

Thereafter, your fax modem will not wait for a dialtone prior to dialing. This change will be in effect until you power cycle your printer.
