LaserWriter Driver 7.1.1 and 7.1.2: Differences

Article Created: 8 October 1992

TOPIC ---

What are the differences between LaserWriter Drivers 7.1.1 and
7.1.2? When should a user upgrade?

DISCUSSION --

The changes in LaserWriter Driver 7.1.2 are as follows:

• Support for the Fonts Folder within the System Folder of System 7.1.

• Workaround for a very rare bug in the LaserWriter IIg: printing
  TrueType fonts after they are downloaded to the printer's hard drive
  sometimes results in incorrect or no output.

• Fix for a very rare bug when printing to a Personal LaserWriter NTR
  with some TrueType fonts: the printer purges the current job
  and restarts.

• Support for fonts with foreign names.

• Enhanced printer memory allocation when printing with TrueType fonts.

Apple recommends upgrading to this driver if you are:
• Using System 7.1.
• Printing TrueType fonts to a LaserWriter IIg with a hard drive.
• Printing TrueType fonts to a Personal LaserWriter NTR.
• Using international system software.
