## **Publish-It Easy: Use LW Driver 7.2 or 7.1.2 (10/93)**

Article Created: 28 October 1993

TOPIC-----

I'm having trouble printing from Publish-It Easy. I am able to print text files properly, but files with graphics and more complicated page layouts give the PostScript error "flushed by LaserWriter, no current point, offending command current point."

Are PostScript errors like this generated by the application, the driver, or the printer?

DISCUSSION -----

Apple contacted TimeWorks, Inc. who develops Publish-It Easy and they are aware of the "no current point" PostScript errors.

Publish-It Easy is only compatible with PostScript Level I print drivers. You're most likely using LaserWriter driver 8.0 or 8.1.1. Apple recommends using LaserWriter driver 7.2 or 7.1.2 instead.
