LaserWriter Driver 8.3.2: Requirements (11/95)

```
Article Created: 30 November 1995

TOPIC -----------------------------------------------------------

What Macintosh models and version of the Mac OS can the LaserWriter 8.3.2
printer driver software be used with?

DISCUSSION ------------------------------------------------------

The LaserWriter 8.3.2 software, which was included with the System 7.5.2
Printing Update v1.1, can be used in place of any version of the LaserWriter 8.x
software. The LaserWriter 8.3.2 driver is supported on any Macintosh computer
using System Software 7.1 or greater.

The Read Me file for the LaserWriter 8.3.2 driver mentions it corrected issues
on new PCI-based Power Macintosh computers, however these issues could have
occurred (in extremely rare cases) on previous Macintosh computer too.
