LaserWriter 16/600 PS: Envelope Feeder Grayed Out (2/95)

Article Created: 14 February 1995

TOPIC ---

I just installed the envelope feeder on to my LaserWriter 16/600 PS (the same
applies to a LaserWriter Pro 630 with its envelope feeder). I tried to print
from the envelope feeder, but the option was grayed out in the print dialog box.
How do I print to envelopes in the feeder?

DISCUSSION ---

Follow these steps to print an envelope from your LaserWriters envelope feeder:

Step 1
Make sure the printer is restarted after physically installing the Envelope
Feeder. The feeder will not be recognized unless it is connected to the printer
at startup.

Step 2
You must either use the LaserWriter 7.2, or LaserWriter 8.x driver. From the
Chooser select one of these print drivers, select a printer, and click the
Setup... button. A dialog box appears with several button options, click the
Configure button. Another dialog box appears, look for the text Envelope Feeder
and a pop-up menu with the options of "Not Installed" or "Installed". You will
need to choose "Installed".

Step 3
For the Envelope Feeder to be available in the Paper Source pop-up menu of the
Print dialog box, you must have an envelope selected in Page Setup. Many
programs let you provide templates or options to print envelopes without having
to select an envelope in the print dialog box.
