System 7.5 Update 1.0 Install: Lose Fax LW Driver (3/95)

Article Created: 24 March 1995

TOPIC -----

I just installed the System 7.5 Update 1.0, and lost the capability to access the Fax phone book through the LaserWriter (LW) 8.2 driver.

Where is the Fax phone book capability? Was the functionality removed?

DISCUSSION -----

System 7.5 Update 1.0 contains the "generic" LaserWriter 8.2 driver not a fax version. This driver does enable you to fax documents if you have the proper PPD for your PostScript fax equipped printer, you do not have access to the Fax Phone Book and, therefore, cannot store multiple fax destinations. The 8.2 driver will remember the last phone number you Faxed to, but if you wish to fax to a different destination, you will need to enter that phone number.

To gain access to the Fax Phone Book, you will need to use the fax LaserWriter driver that came with your printer, such as 8.1.2f or the newer 8.2f.
