## LaserWriter 8.4.x: Doesn't Support Custom Page Sizes (2/97)

Article Created: 5 February 1997

TOPIC -----

After upgrading to LaserWriter 8.4.x from LaserWriter 8.3.4, I can no longer select a custom page size in my Page Setup dialog. I am printing to an imagesetter which supports various paper sizes, and have been able to input custom page sizes with prior versions of the LaserWriter 8 printer driver. What is wrong?

DISCUSSION -----

As of LaserWriter 8.4, support for custom page sizes was removed from the LaserWriter 8 printer driver. This feature was not implemented well, so it was removed. There are plans to incorporate custom page sizes again in later releases of the LaserWriter 8 printer driver using a new and improved user interface.

### Workarounds

=====

- Use the Adobe PS Printer driver
- Use the LaserWriter 8.3.4 printer driver.
