LaserWriter IINTX: Does Not Support 6MB Configuration

Article Created: 13 July 1988
Article Last Reviewed: 28 March 1991
Article Last Updated: 28 March 1991

TOPIC ---

Can you upgrade the LaserWriter IINTX memory to 6MB of RAM?

DISCUSSION --

Specified memory configurations for the LaserWriter IINTX include 2, 3, 4,
5, 8, 9, and 12MB RAM.

The 6MB configuration is not supported by the LaserWriter IINTX hardware
and firmware. It is physically possible to plug 6MB into the printer, but
the printer will not recognize the extra memory.
