LaserWriter IINTX: How To Use IBM Fonts (8/95)

Article Created: 22 March 1988

Article Reviewed/Updated 22 August 1995

TOPIC -----

Can I download my IBM fonts to the hard disk attached to my LaserWriter IINTX?

DISCUSSION -----

You can't download IBM fonts to a LaserWriter IINTX hard disk: the IBM downloader currently downloads only to RAM.

However, screen fonts common to both Macintosh AND a given IBM can be downloaded from Macintosh and then accessed through the IBM.

An example: if you download the "Garamond" font from a Macintosh to the LaserWriter IINTX hard disk, you can then access that font from an IBM, if "Garamond" is an installed screen font on that IBM.
