## LaserWriter IINTX: Downloading PC Fonts To Hard Disk

This article last reviewed: 14 December 1989

TOPIC -----

I have several PCs and one LaserWriter IINTX. I will be using PostScript software on the PC.

How do I download PC fonts to a SCSI hard disk connected to the LaserWriter IINTX? Is there a special driver required? Does AppleShare PC include this option?

DISCUSSION -----

Adobe Systems provides software with their font library for the IBM PC and compatible computers that will download Type 1 PostScript fonts to the LaserWriter IINTX hard disk.

This is the only software we know of that will download Type 1 PostScript fonts to the LaserWriter IINTX hard disk. There is no way to download non-Type 1 PostScript fonts to the LaserWriter IINTX. An example of a non-Type 1 font would be any font created using third-party (not Adobe) font creation programs. We suggest you contact Adobe Systems, Inc. for more specific information.
