IINTX w/Rev 3 ROMs: Format HD w/LW Font Utility 2.0.2

This article last reviewed: 19 November 1990

TOPIC -----

I recently upgraded my LaserWriter IINTX logic board with revision 3 ROMs. The third-party fonts cause initialization errors when printing. However, if I move the same external hard disk to a non-upgraded LaserWriter IINTX, these fonts print just fine. Where's the problem?

DISCUSSION -----

The LaserWriter IINTX with Rev 3 ROMs does not work properly with a hard disk formatted with the LaserWriter Font Utility 1.x. You need to reformat the disk and copy the fonts back onto the hard disk using the LaserWriter Font Utility 2.0.2. There is no way to make this procedure easier.
