LaserWriter IINTX: Font Utility Shows When You're Out of Storage

Article Created: 29 April 1991

Article Last Updated:

TOPIC -----

I have a hard disk attached to my LaserWriter IINTX. I know that I'm using 80% of my disk space for caching and only 20% for font storage. Does this mean I only have room for 8MB of fonts on a 40MB hard disk?

DISCUSSION -----

Your hard disk has room for only 8MB of fonts. The Font Utility application gives you a warning when the disk is getting too full. If you have several large fonts, you might not be able to get 8MB of fonts on the drive before the utility tells you you're running out of room.
