MACLAN: Printing AS/400 Jobs to LaserWriter IIf Via PS/2

Article Created: 5 February 1992

Article Last Reviewed:

Article Last Updated:

TOPIC -----

We are looking for a software package running on a DOS-based PS/2 model 35sx that allows printing jobs coming from an AS/400 on a LaserWriter IIf over LocalTalk. The PS/2 has both an SDLC card and a Farallon LocalTalk PC card installed, providing communication via leased line to the AS/400 for administrative duties, and connection to the AppleShare server.

DISCUSSION -----

MACLAN Connect F/P from Miramar Systems might work for you. After successful connection between the AS/400 and the PS/2, MACLAN Connect F/P running PS/2 provides an AFP File Server and Print Server to the network. PC and Macintosh computers can share PostScript printers and files.

On AppleLink, you can find contact information for the various vendors by clicking the Library Index button to view the folder structure in the Tech Info Library. An alphabetic listing of vendors is in the Third Party Company Directory folder.
