LaserWriter IIf and IIg: Toner Cartridges

Article Created: 23 March 1992

Article Change History

04/16/93 - CORRECTED

- To discuss refilled, rather than remanufactured toner cartridges

TOPIC -----

The new toner cartridges have the same part number as the old ones. Is there any way to distinguish the new ones from the old ones?

DISCUSSION -----

No. Apple started shipping the new toner cartridges about two months before the introduction of the LaserWriter IIf and LaserWriter IIg. There should be very few of the old cartridges in use now.

Note: Apple doesn't recommend the use of refilled toner cartridges with the LaserWriter IIf and LaserWriter IIg. This is especially true when using PhotoGrade.
