LaserWriter Select 300: Connectivity (12/94)

Article Created: 9 February 1993
Article Reviewed/Updated: 12 December 1994

TOPIC ---

This article describes the connectivity features of the LaserWriter Select 300
printer.

DISCUSSION --

The LaserWriter Select 300 printer contains one communications port: a
high-speed serial port for Macintosh connectivity. This printer has no
LocalTalk port; it can, however, be shared over a network with the included
GrayShare printer driver software.

The LaserWriter Select 300 is a QuickDraw printer and does not support any other
type of printer control language. This printer is designed for use only with the
Macintosh computer.

Serial Port

The serial port on the LaserWriter Select 300 is a special externally clocked
high-speed serial port supporting baud rates up to 909 kbps. There are no
switches or jumpers for configuring the serial port baud rate.

Article Change History:
12 Dec 1994 - Corrected Serial port information.
