## LaserWriter Select 310: No GrayShare Support (4/96)

Article Created: 8 April 1993

Article Reviewed/Updated: 12 April 1996

TOPIC -----

Will Apple support GrayShare technology in the LaserWriter Select 310?

DISCUSSION -----

There are currently no plans to provide "sharing" functionality for the LaserWriter Select 310. Since GrayShare was designed for QuickDraw-based printers, it does not support the LaserWriter Select 310. Using QuickDraw GX you can use the LaserWriter GX driver. This allows you to use the LaserWriter Select 310 on more than one Macintosh computer. However, anyone on the network who wants to print to the LaserWriter Select 310 must use QuickDraw GX. If QuickDraw GX is not used, it can only be used as a single-use serial PostScript printer.

Article Change History:

12 Apr 1996 - Added QuickDraw GX solution.
