LaserWriter Pro and Select 310: PageMaker 4.2 and PPD (4/93)

Article Created: 21 April 1993

TOPIC ---

I have a LaserWriter Pro 630 and I'm using PageMaker 4.2. I realize that
I need a new PPD to use the printer with PageMaker 4.2. I found the PPD
on AppleLink, and placed it in my System Folder in the following location:

        System Folder
          Aldus
            PPDs

PageMaker was not able to see it. I went back to AppleLink and I read
that PageMaker wants to see .PPD at the end of the PPD file. I changed
the name, but it still doesn't work. I get a message that says:

"Internal Error: Bad Printer Description file LASERWRITER PRO 630
V2010.PPD, line 53". Then next to the CONTINUE button it says 7304:5953.

DISCUSSION --

The problem is related to PageMaker 4.2 being unable to recognize PPD
files of version spec 4. The PPD files for the LaserWriter Pro series and
LaserWriter Select 310 are of version 4, and PageMaker 4.2 only
recognizes version 3 files. The resolution is to upgrade to PageMaker
4.2a, which recognizes PPD spec 4 files.
