LaserWriter Pro 810: DOS Fax Software On Windows Disk (3/97)

Article Created: 15 September 1994

TOPIC -----

Is there a manual or MS-DOS software available for the optional fax card in the LaserWriter Pro 810?

DISCUSSION -----

The DOS Fax software for the LaserWriter Pro 810 is located on the "LaserWriter Pro 810 Fax Software for Windows" Diskette that ships with the printer. Although not readily apparent, the psfax files on the disk are in fact the DOS fax software. The LaserWriter Pro 810 uses the same PSFAX as the LaserWriter Select 360. For a list of valid commands for psfax, go to the DOS prompt and type:

psfax/?

NOTE:

The LaserWriter Pro 810 fax software does not work with Windows 95 or Windows NT, you must use Windows 3.x.
