## LaserWriter: Printing on Heavy Paper

This article last reviewed: 28 November 1990

TOPIC -----

Can any LaserWriter print on 65-pound paper (card stock used on shelves)?

DISCUSSION -----

The "LaserWriter II Owner's Guide" specifies the paper at:

16-lb. to 20-lb. photocopy or typewriter bond (60 to 80 g/m<sup>2</sup>) in normal mode; up to 36-lb. (135 g/m<sup>2</sup>) stock in manual mode with face-up tray open.

We don't know of a way to use a LaserWriter to print on 65-pound paper. The LaserWriter paper path will not support paper of that thickness, nor is there enough heat to fuse the toner through paper that thick.

You can, of course, use the LaserWriter to print labels and stick them to any thickness of paper. Labels as large as 8.5 X 11 are available.
