- Vendor information.

TOPIC -----

I'm trying to print envelopes with a Personal LaserWriter, but can't get a clean feed when using envelopes.

DISCUSSION -----

The Personal LaserWriter models have a somewhat more complex paper path than that of the LaserWriter II models. We have heard reports of problems with some envelopes, especially those made from a heavy stock.

Handling can be improved by using envelopes that are approved for use in laser printers and copiers, and by feeding to the face-up delivery tray. The recommended envelopes are No. 10 (standard business envelopes) or those specially made to withstand use in laser printers and copiers. Two manufacturers of such envelopes are James River Corporation (Groveton Division) and Avery. Check with your local office supply dealer or with the manufacturer.

To locate a vendor's address and phone numbers, use the vendor name as a search string.
