## LaserWriter IIf and IIg: Camera-Ready Art

Article Created: 7 October 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

Can prints from a LaserWriter IIf or IIg be copied or taken to offset press?

DISCUSSION -----

As with a photograph or high-quality print, PhotoGrade and FinePrint can be copied or used as camera-ready art. The resulting quality depends on the quality of the copy devices and processes. We see some degradation of quality. The printers can be set so they offer inferior originals that are more reproducible.
