TOPIC -----

I'm confused about the optional paper and envelope feeder for the Apple Personal LaserWriter LS.

Apple's price list states that the Personal LaserWriter LS requires a Personal LaserWriter LS Paper Feeder to accept the optional Letter, Legal, and Envelope cassettes.

I've read all the available Personal LaserWriter LS literature and can find no other mention of the Paper Feeder. Do I really need to get the Paper Feeder, and where do I get more information about it?

DISCUSSION -----

The Personal LaserWriter LS has two standard ways to feed-in paper:

- Manual feeding using the multi-purpose tray, or
- stacking 50 pieces of paper or less in the multi-purpose tray.

There is an optional, dealer-installable, Personal LaserWriter LS Paper Feeder that works with the Personal LaserWriter Letter Cassette, Personal LaserWriter Legal Cassette, or Personal LaserWriter Envelope Cassette.

You don't need the Personal LaserWriter LS Paper Feeder to use the printer. It is only necessary if you want to have a 250-sheet capacity Personal LaserWriter Letter Cassette or Personal LaserWriter Legal Cassette, or the handy Personal LaserWriter Envelope Cassette.

The Personal LaserWriter LS Paper Feeder documentation is in the Personal LaserWriter LS Owner's Guide on pages 79-86.

The Apple part number for the Personal LaserWriter LS Paper Feeder is M8028G/A.

The Apple Personal LaserWriter LS product sheet (M1076LL/A) mentions the Personal LaserWriter LS Paper Feeder under the "Related Products" section.
