Personal LaserWriter LS: Upgrading to 1MB RAM

Article Created: 1 May 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

This article tells you what you need to upgrade a Personal LaserWriter LS to 1MB of RAM.

DISCUSSION -----

The standard amount of RAM in a Personal LaserWriter LS is 512K. The speed of this RAM is 100ns.

To upgrade to 1MB, you need four 256K x 4-bit 100ns RAM chips. Third-party companies supply this memory. Note that this is NOT 256K x 1-bit memory, which the Apple IIGS uses.
