## Personal LaserWriter LS: Missing Excel Page Setup Options

Article Created: 7 June 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

When printing from Excel 2.2 or 3.0, some of the Page Setup options are dimmed and not accessible. Do I have a problem with my Personal LaserWriter LS driver?

DISCUSSION -----

No. Microsoft Technical Support has verified that certain options under Page Setup are not accessible when printing from Excel 2.2 or 3.0 to the Personal LaserWriter LS. The inaccessible options include 75% and 50% under the Size option and the Precision Bitmap Alignment option under Printer Effects. There is no workaround at present.

Microsoft Word and Microsoft Works take full advantage of all of the Personal LaserWriter LS options.
