Personal LaserWriter LS: Scaling Limits

Article Created: 11 November 1991

Article Last Reviewed:

Article Last Updated:

TOPIC -----

I'd like to print to the Personal LaserWriter LS at 85% reduction, but only 50% and 75% are available. Is there a way to get reduction in print size, via the page layout, other than 50% and 75%?

DISCUSSION -----

The current implementation of the Personal LaserWriter LS driver is limited to the 25% reduction increments, and there is no way to modify this.

A possible workaround is called DynoPage, by Portfolio Systems, Inc. In addition to reduction options, it allows double-sided printing and printing to any page size. It can be extended to user-specified page layouts.

On AppleLink, you can find contact information for the various vendors by clicking the Library Index button to view the folder structure in the Tech Info Library. An alphabetic listing of vendors is in the Third Party Company Directory folder.
