Personal LaserWriter LS: Use 100 ns or Faster DRAM (8/95)

Article Created: 22 January 1992
Article Reviewed/Updated: 22 August 1995

TOPIC ---

Can I use 60 ns 256K x 4-bit DRAM to upgrade a Personal LaserWriter
LS?

DISCUSSION --

Yes. The Personal LaserWriter LS specifications state that you can use
RAM rated at 100 ns or faster, and 60 ns RAM is faster than 100 ns RAM.
Although the RAM is rated faster than 100 ns, it still will be accessed
at the 100-ns rate.

Article Change History:
22 Aug 1995 - Corrected type of DRAM used.
