Personal LaserWriter LS: No Driver with System 7.5 (2/95)

Article Created: 19 September 1994

Article Reviewed/Updated: 16 February 1995

TOPIC -----

I have a Personal LaserWriter LS printer and installed System 7.5, but I cannot find the Personal LaserWriter LS printer in my Chooser. Is the Personal LaserWriter LS printer supported under System 7.5?

DISCUSSION -----

The Personal LaserWriter LS driver that shipped with the printer does not work with System 7.5. In order to use the Personal LaserWriter LS printer under System 7.5, use the LaserWriter 300 printer driver. If you installed QuickDraw GX, use the LaserWriter 300 GX driver.
