Personal LaserWriter SC: Scaling Options Not User-Adjustable

This article last reviewed: 20 December 1990

TOPIC ---

In the Personal LaserWriter SC print dialog, scaling options are presented as
radio buttons in 25% increments. How can I choose some other scale, say 89%?
Can I use someone else's drivers?

DISCUSSION --

The scaling options provided by the Personal LaserWriter SC driver are hard-
coded.

We don't know of any compatible third-party drivers for the Personal
LaserWriter SC. Current drivers from other LaserWriters will not work; the
Personal LaserWriter SC is not software-compatible with third-party printers.
