TOPIC -----

This article describes the Utility software, version 7.2, used with the Personal LaserWriter NTR.

DISCUSSION -----

The LaserWriter Utility software provided with the Personal LaserWriter NTR is a slightly revised version of the utility that shipped with the LaserWriter IIx and IIg. The updated version includes some bug fixes and some minor changes to handle port configuration. These are the supported functions:

- Disable Start
You can disable/enable the printing of the page Start Page when you turn the printer on.
 - Configuration
You can set the parameters for user-defined switch settings (emulation, baud rate, data length, hand shaking, port, and cut sheet feeder).
 - Naming
You can change the printer's name.
 - Download Fonts
You can download PostScript and TrueType fonts to DRAM.
- Copyright 1992, Apple Computer, Inc.
