LaserWriter 6.0.1: Defaults to Black and White (11/94)

Article Created: 20 December 1990

Article Reviewed/Updated: 28 November 1994

TOPIC -----

I want to change the default setting in LaserWriter 6.0.1 to black and white printing, because a customer does all of his printing is black and white. Can you help?

DISCUSSION -----

Without going into the code of the print driver, it is not possible to alter the default setting. Subsequent versions of the driver now default to Black and White. If you require this for your default, it is recommended that you upgrade to a later version of the driver.
