Turning Off Printer Configuration Pages Upon Startup (2/96)

Article Created: 16 Jun 1994
Article Reviewed/Updated: 26 February 1996

TOPIC ---

Why does my printer still produce a configuration page even though I have turned
it off using LaserWriter Utility?

DISCUSSION --

If your LaserWriter Pro 600, Pro 630, LaserWriter Select 360, or Personal
LaserWriter NTR has the communication switch set to number 4, it will print a
configuration page on power-up. The configuration page is different than the
start-up page that the LaserWriter Utility allows you to turn off. The
configuration page provides information about many parameters that the start-up
page does not mention.

To disable the printing of the configuration page, you must change the
communication switch setting on the printer to any number other than 4.
