Apple LaserWriter Printers: MIB Support (1/96)

Article Created: 29 January 1996

TOPIC -----

I am using Hewlett Packard (HP) K200 UNIX servers, and I would like the Simple Network Management Protocol (SNMP) Management Information Block (MIB) information for the following Apple LaserWriters:

- LaserWriter 16/600 PS
- LaserWriter Select 360
- LaserWriter IINT
- LaserWriter IINTX
- LaserWriter Pro 630

DISCUSSION -----

The printers you listed have no SNMP MIB agents. As a matter of fact, the only printer in your list that supports TCP/IP is the LaserWriter 16/600 PS printer.

The only printer Apple has shipped that is SNMP compliant is the LaserWriter Pro 810 with its Virtual Printer Technology (VPT). VPT is SNMP compliant with MIB II, Character MIB, and RS-232 MIB.
