LaserWriter Driver 8.x: LW Icon Isn't in Chooser (11/96)

Article Created: 21 November 1996

TOPIC ---

I am installing my LaserWriter printer and the instructions say to select
LaserWriter 8 in the chooser. I have installed the software multiple times, but
there is still nothing in the chooser that reads LaserWriter 8.

DISCUSSION --

Check the listing of icons in the Chooser for a printer Labeled LaserWriter GX.
If you see this printer active, you have QuickDraw GX installed and active. When
QuickDraw GX is active, non-GX printer drivers, such as the LaserWriter 8 are
hidden, and only the QuickDraw drivers are available. You can select and use the
LaserWriter GX icon instead of the LaserWriter 8 driver if you want. For more
information about Quickdraw GX consult the documentation that came with your
system software, and the manual that came with your printer.
