LW Printers: Using a Multipurpose Tray w/ QuickDraw GX (11/96)

Article Created: 22 November 1996

TOPIC ---

I am printing to a LaserWriter printer using Quickdraw GX and cannot find an
option for the multipurpose tray in the print dialog box, or in tray options.

DISCUSSION --

There is no multipurpose tray option within QuickDraw GX. There is a selection
for manual feed in the print dialog. You can use this option with minor setting
changes to obtain the same functionality as the multipurpose Tray option.

Using the QuickDraw GX Manual Feed With A Multipurpose Tray
===

Click on the desktop printer icon. A Printing menu appears in your menu bar next
to the Special menu. If a Check appears next to Show Manual Feed Alerts, you
need to disable the alert messages, by choosing Show Manual Feed Alerts. If you
do not have a check next to the Show Manual Feed Alerts, manual feed alerts is
already disabled, so you can use your multipurpose tray without making any
changes.

The only PostScript LaserWriter you cannot use this workaround with is the
LaserWriter Select 310 printer. There is no manual feed disable feature
available with this printer.
