Portable StyleWriter: Manual Feed (7/93)

```
Article Created: 13 July 1993

TOPIC --------------------------------------------------------

This article discusses how to load envelopes or other material in the
Portable StyleWriter.

DISCUSSION ---------------------------------------------------

You can load one envelope, transparency, or sheet of stock paper in the
printer for a manual feed.  The printer should be turned on, with the Power
and Error lights lit.

1)  Position the printer for vertical operation by rotating the footer on
    the back of the printer case.

2)  Open the top cover.

2)  Set the paper thickness adjustment dial in the correct position.
    The thumbwheel is located on the right bottom of the printer.
    For example:  Set the dial to the envelope icon if you will be
    printing on an envelope.

3)  Align/insert the envelope or sheet into the slot on the back of the
    printer.

    NOTE: The printer prints on the side of the envelope or sheet that
          faces up.

4)  Press the LF/FF button to feed the material into the printer.  The
    Error light turns off.

5)  Press the On Line button to make the printer ready for printing.
