Portable StyleWriter: Printing to PowerBook 500 Series (6/94)

Article Created: 10 Jun 1994

TOPIC ---

Why doesn't the PowerPrint software that comes with the Portable StyleWriter
work with a PowerBook 520?

DISCUSSION ---

It works when you select in the Chooser that the Portable StyleWriter is
connected to the Modem port. It does not work (the PowerBook 5x0 just beeps)
when you attempt to print when the printer is connected to the Printer port. On
some occasions, you may receive errors -96 and -98, but again, are resolved by
selecting the Modem port.
