Portable StyleWriter: Background Printing Not Available (2/95)

Article Created: 13 February 1995

TOPIC -----

When I go to the Chooser, the background printing option is not available for the Portable StyleWriter. Background printing is available for all other printers. Can I print in the background?

DISCUSSION -----

Background printing on the Portable StyleWriter works differently than on other Apple printer. The Portable StyleWriter uses an application called SpoolMaster instead of the PrintMonitor for background printing. In order to use SpoolMaster, the SpoolLauncher extension must load at startup. If this extension is missing or not loaded at startup, the background printing option is not available for the Portable StyleWriter.

Note:

Restarting with extensions off disables SpoolMaster but not the PrintMonitor.
